

IRON RANGE ENGINEERING BELL PROGRAM

Our “why”

We believe in giving individuals the liberty to pursue their own path to engineering excellence. We strive to empower individuals to become engineers that will one day change the world. We support students in an inclusive environment throughout their time in the Bell Program.

Become the engineer YOU want to be!

The Bell Program is a work-based opportunity for community college students to complete a bachelor’s degree while working as an engineer and earning substantial wages. Upon completion of community college, students complete one training semester with Bell and then embark on two years of co-op at any location.

All types of engineers are welcome.

Pre-engineering
coursework

 **Bell
Academy**
1 Semester

 **Internships, Co-ops,
Design Experiences**
2 Years, anywhere in the WORLD!

 **Degree:
B.S. in
Engineering**
As little as 4.5 Years

What industry is saying about Bell...

"The Bell Program is aspiring to be something **extraordinary**. The program's invested value in it's students rings through during interactions with them. Bell's new approach to education **creates opportunities** for talented individuals in a way that allows them to find and pursue their best. At Bell, they are not only creating value for their students, but they are also getting it right for industry.

These are the types of initiatives that help **shape our future** by creating an invested and balanced world."

*Jason Johnson, Electrical Engineering Manager
